

# Nokia Browser for Series 40

## Better, faster and more affordable!

- **Data compression saves time and money** for consumers by speeding up page downloads, and is more efficient for operators by reducing over the air traffic on bandwidth constrained networks.
- **Makes favorite content easy to find** with locally relevant information, the latest highlights and a list of popular web content that matters to you.
- **Web apps take the Internet and optimize it for your phone**, making the content easy to see and use.
- **Makes the mobile web familiar** by presenting country or operator specific start screens.

## Web apps

- Series 40 web apps are a **new and optimized** way users can access their favorite Web content on their Series 40 phones. Web Tools for Series 40 makes it **quick and easy** to create web applications.
- Through web apps for Series 40 phones, developers can now access a **much wider consumer base** for their applications, driving even **more revenue opportunities**.

Nokia Browser for Series 40 is available in 87 languages
